

## STORAGE BACKUP

We strongly recommend that you take regular backups of your music library.

This application provides you with a very simple way to make backup copies of your music files. A handy feature of this app is that if you add new music the Storage Backup app will only need to copy the new files. The backup is unencrypted, so you can remove the drive from the Antipodes, attach it to another device, and copy from it.

There is no Storage Restore app. To restore from the backup, see the section in this Guide '**Manage Files**' for how to do a full or selective copy to restore your files. The '**Manage Files**' section also discusses how you can do automated backups over your network using your preferred third-party backup software.

At the Antipodes GUI, click on '**Apps**'.

Connect an external USB drive to the Backup USB port at the back of your Antipodes. Click on '**Storage backup**'.

Antipodes Home **Apps** Settings Help System ▾

### Storage backup

[Backup to USB drive](#) [Format USB drive](#)

Backup status

You have attached a 1500GB drive and you have 1.1T of files on /storage to backup.

Backup Log

12/18/2015 05:30:59 - USB disk added [Disk /dev/sdb: 1.4 TiB, 1500301909504 bytes, 2930277167 sectors]

**antipodes** Copyright © 2015 Antipodes Audio Limited. All rights reserved. [www.antipodesaudio.com](http://www.antipodesaudio.com)

If this is the first time you have connected the USB drive to the Antipodes for backup, make sure you do not need any files that are currently on the drive, and click on the '**Format USB drive**' button. If you have backed up to this USB drive before do not format it and go straight to the step below to click on the '**Backup to USB drive**' button, and the process will only add new and changed files to the USB drive.

**Format USB drive**

Are you sure you want to format and DESTROY ALL DATA on your drive?

Close [OK](#)

Click '**OK**' and the screen will display progress until it has finished formatting the USB Drive.

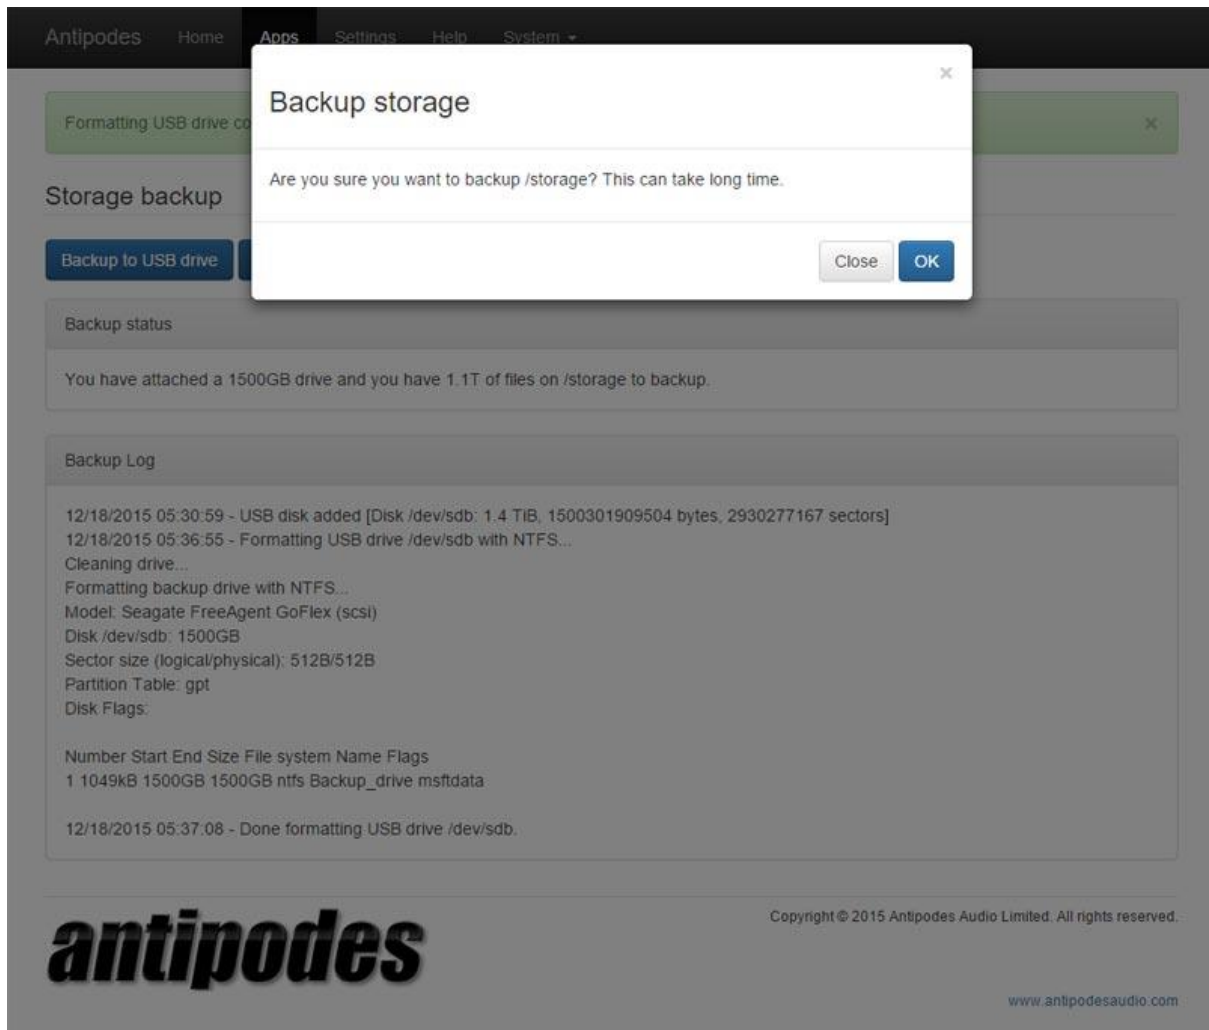

The screenshot shows the Antipodes application interface. At the top, a navigation bar includes 'Antipodes', 'Home', 'Apps', 'Settings', 'Help', and 'System'. A green notification bar at the top states 'Formatting USB drive complete.' Below this, the 'Storage backup' section contains two buttons: 'Backup to USB drive' and 'Format USB drive'. Underneath, the 'Backup status' section displays the message: 'You have attached a 1500GB drive and you have 1.1T of files on /storage to backup.' The 'Backup Log' section provides a detailed record of the formatting process, including timestamps, disk specifications (Seagate FreeAgent GoFlex), and the completion of the NTFS formatting.

When the USB drive has been formatted then click the '**Backup to USB drive**' button.

Click the '**OK**' button and the screen will display progress until it has finished the backup to the USB Drive, adding all new and changed files added since the last backup.
