

5 Setup Remote Control

INTRODUCTION

To control what your Antipodes plays, you need to setup remote control on a desktop, laptop, tablet or smartphone that is connected to the same network as the Antipodes.

The Antipodes and remote control device talk to each other over your network. The Antipodes displays your music files and streaming services on the remote device, and you use the remote device to tell the Antipodes what to play.

The remote control applications are simple and intuitive to setup and use.

The steps involved are:

- download the remote control application to your device
- complete the setup of the remote control application, and set it to control the Antipodes.
- use the remote control application to play music.
